Re: Kennecott Utah Copper Corporation South Facilities Groundwater
Remedial Action Preliminary Design

Dear TRC Member:

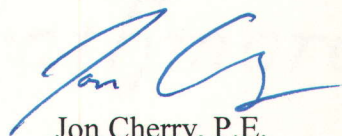

Please find attached your copy of the Kennecott Utah Copper Corporation South Facilities Groundwater Remedial Action Preliminary Design. As discussed at the October 2001 TRC meeting, the Preliminary Design has been prepared as the initial engineering design document for the groundwater remediation project and includes the following elements:

- performance and, as appropriate, design criteria;
- project delivery strategy;
- results to date of treatability studies and additional field sampling;
- preliminary plans, drawings and sketches;
- outline of required performance objectives and/or specifications;
- preliminary construction schedule.

Kennecott would be pleased to receive written comments during the next 45 days regarding the Preliminary Design. Comments received within 45 days will be considered and incorporated (if applicable) into the Final Remedial Design, which is scheduled to be completed at the end of 2002.

If you have any questions, or would like to discuss any aspects of the project, please call me at 801-569-7128 or contact me via email at CherryJ@Kennecott.com.

Sincerely,

Jon Cherry, P.E.
Senior Project Engineer
